

Supplement 3 – UK Passenger Transport Category

3.1 General Information.

This supplement is issued to cover additional actions to be taken to safely and efficiently fly and operate an Ultramagic hot air balloon in the United Kingdom Civil Aviation Authority certification category of Public Transport .

3.2 Limitations

3.2.1 Minimum Safety Equipment

A pilot restraint harness must be provided

3.2.2 Crew

The maximum number of passengers permitted is nineteen. The following requirements must be met.

1. The maximum number of occupants including passengers and crew per compartment must not exceed six.
2. At least one rope handle must be provided for each passenger.
3. The loading limitations must be complied with.
4. Where more than four passengers are carried the envelope must be fitted with rotation vents.

3.2.3 Tethered Flight

The balloon is not approved for tethered flight when carrying fare paying passengers. A pre-takeoff basket restraint is permitted.

3.2.4 Other manufacturers equipment.

The basket, burner and load frame must be produced by the same manufacturer and must have been previously certified in public transport category.

3.3 Emergency Procedures

No change

3.4 Normal Procedures

No change

3.5 Loading

No change

3.6 Balloon and Systems Description

Additional equipment as listed in 3.2.4

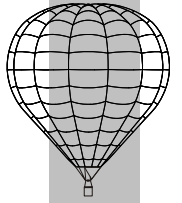

3.7 Balloon Maintenance, Handling and Care

No change

3.8 Other Manufacturers Equipment

3.8.1 Requirements

The basket, burner and load frame must be produced by the same manufacturer and must have been previously certified in public transport category.
